

# HELLO!

*“Thank you for downloading Velvet Sky Theme. Please follow our simple step-by-step guide for installing and customizing the theme.”*

## VELVET SKY THEME [PRESTASHOP 1.4.2.5]

Velvet Sky is a free e-commerce theme created by DapurPixel. We released it for two platforms: Prestashop and Wordpress. Velvet Sky has a glamour design that stands out for online store. This theme is released under Creative Commons.

## FEATURES

- Prestashop 1.4.2.5 compatible
- Custom homepage
- 2 columns of fixed width
- Horizontal menu & submenu integration
- Custom slideshow module
- Combo slider on homepage
- One page & guest checkout supported
- Custom advertisement block
- Firefox, IE7+8, Safari, Opera, Chrome compatible

## UPLOAD FILES

Please follow these installation instructions:

1. Unzip the **velvetsky-theme.zip** file.
2. Copy the content of **/themes** folder to the new **/themes** folder.
3. Copy the content of **/modules** folder to the new **/modules** folder.

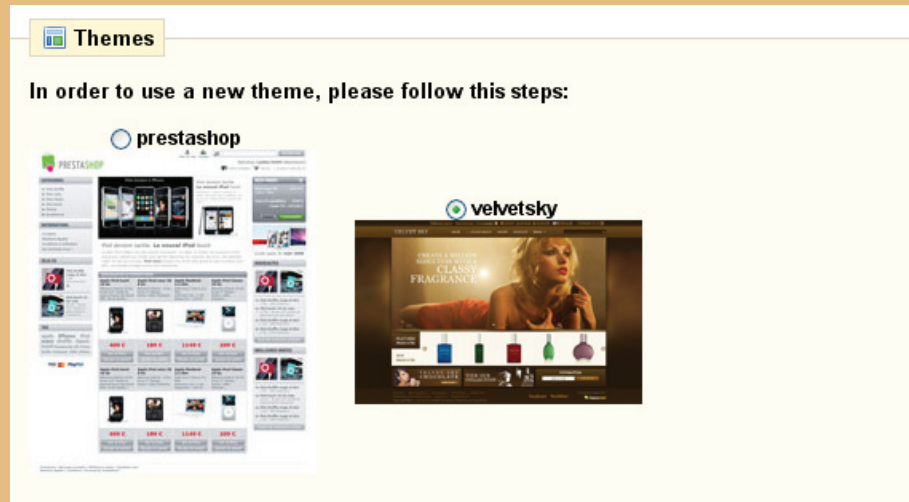

## APPEARANCE

You can configure the store appearance by login to your Prestashop admin panel, click on **Preferences**, and then click **Appearance**.

On Appearance section, you can upload different type of logos for your store. Open **velvetsky-theme/props/logo-files** and upload these images to the correct upload forms.

1. You can adjust logo size and position on themes/velvetsky/global.css on line 211 and 216.
2. Upload other logo image to **Mail logo** and **Invoice Logo**. These images will appear on e-mail and invoice headers.
3. Upload your **favicon.ico** to **Favicon**. This image will appear in the address bar of your web browser.
4. Upload your transparent (GIF) logo to **Store icon**. This image will appear on the store locator (inside Google Maps).
5. Click **Save**.

On Themes section, choose the **velvetsky** theme. Don't forget to click the **Save** button.

## MODULE

The **VelvetSky** theme uses custom modules. You can see the modules in **Back Office > Modules**. Some of these modules need to be configured to make it works.

Custom modules for Velvet Sky Theme:

- Block Advertising Home – **blockadvertisinghome**
- Block Banner – **blockbanner**
- CMS Block – **blockcms**
- Newsletter Block – **blocknewsletter**
- User Info Block – **blockuserinfo**
- Wishlist Block – **blockwishlist**
- Combo Slider on the Homepage – **comboslider**
- Julien Breux horizontal menu – **jbx\_menu**
- Products Category – **productscategory**
- JQuery Nivo Slider – **slideric**

### **[IMPORTANT]** Smarty Compile in Prestashop 1.4

Follow these simple steps to enable Force Compile and disable cache in admin panel when you are still in theme development process.

- Go to **Back Office > Preferences > Performance**
- On **Smarty** section, enable Force Compile and disable Cache

Or, you can delete cache manually in **/tools/smarty/compile** directory.

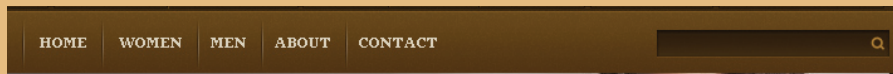

# MODULES ON HEADER

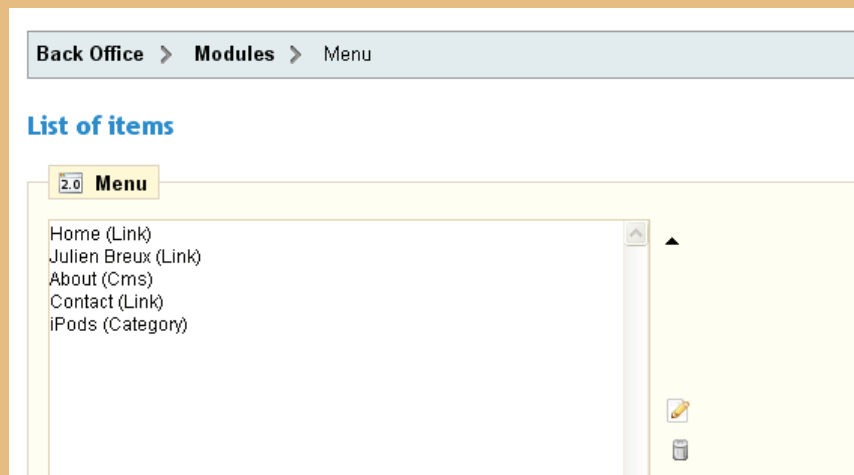

To configure module positions:

- Go to **Back Office > Modules**. Open **Search and Filter** tab and then uninstall **Quick Search block**. We do not need this module since we will have it from Julien Breux Menu module.
- Open **Front Office Features** tab and find **Julien Breux Menu**. Install this module.

## Advance Top Menu

First, install **Menu v2.7.1** module and then click **Configure**.

First, install **Menu v2.7.1** module and then click **Configure**.

## Add New Menu

To add a menu, in **Add Menu** box do as the following:

1. **Type**. Choose one of the desired menu item type.
2. **Parent Item**. This one will show the menu list which has been created or had exist before. Choose the parent item for the item to be listed as child menu.
3. **CSS ID**. This option will come in handy if you want to have distinctive menu in the menu list.
4. **Title**. Fill the desired title for created menu. It will show as the menu in the menu list.
5. **Must be logged**. Check if you want to restrict unregistered member to access the menu.
6. **Icon**. Upload the icon for the menu. It's up to your preference for image size and type, but up to 48x48 pixels size and .png or .gif format recommended.

**Add item**

**Type:** -- Select an item type -- \*

**Parent Item:** -- Choose a parent item --

**CSS ID:**   
Use this option to set a CSS ID to this item.

**Title:**    
If you leave the field blank, the default title will be used.

**Must be logged:** ☐  
User must be logged.

**New window:** ☐  
On click, open link in new window.

**Icon:**

## ATTENTION

Please uninstall the Quick Search Block module and make sure Menu v2.7 (JBX Menu) module positioned at the bottom.

## MODULES ON HOMEPAGE

To configure module positions on homepage:

- Go to **Back Office > Modules**.

### Install these following modules:

- JQuery Nivo Slider
- Combo Slider on the Homepage
- Block Advertising Home
- Block Newsletter

### Uninstall these modules:

- Home text editor
- Featured Products on the homepage

## JQuery NIVO SLIDER

To add images in homepage slider, open the **Front Office Features** tab and click **Configure** on **JQuery Nivo Slider**. You can add up to four images on the slideshow. Default size for slideshow image is **940 x 404 pixels**.

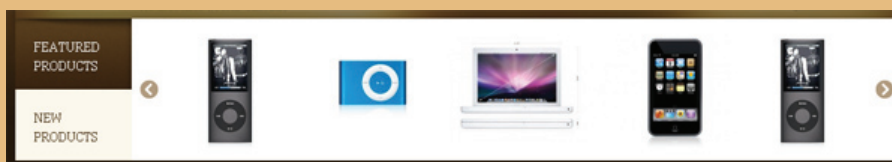

### ATTENTION

All uploaded images will be stored in **/modules/slideric** folder and automatically renamed as **en0.jpg**, **en1.jpg**, **en2.jpg** and **en3.jpg** respectively. Two letters (en) in front of each numbers is the language ISO code. If you install other languages, then you need to copy the images and **enlinks.xml** and rename it with the appropriate ISO code.
