# INSTALLATION

Just drag the contrast folder into your worpress themes folder located in the wp-content folder. No plugins are needed. How to insert images and video will be explained further down in this document.

# GENERAL SETTINGS

You can of course change the name and the tagline of your site. Be sure to use a tagline, or else the balance of the design will be ruined.

You can also change the rights of the content(01) in the footer, the quote(02) and the source of the quote(03). You do this under appearance -> contrast options in the wordpress admin. If you don't change this a placeholder text will be displayed.

# STURCTURE

The theme is based on categories. Before you start adding posts you have to define which categories you want to use. The menu is built for up to twelve categories, you can of course add more categories but they won't show up in the menu. *Home* is static and will always show and you can't add the category *blog*, If you want a blog, set it up seperately.

The categories *about* and *contact* is are custom made, for them to be shown correct you have to name the Category Slug(04) *about* and *contact*.

Settings

Edit Category

Category Name

contact

The name is used to identify the category almost everywhere, for example under the post or in the category widget.

Category Slug

04

contact

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Category Parent

None

Categories, unlike tags, can have a hierarchy. You might have a Jazz category, and under that have children categories for Bebop and Big Band. Totally optional.

Description

05

The description is not prominent by default, however some themes may show it.

Update Category

Thank you for creating with WordPress. | Documentation | Feedback

Version 2.8

*About* and *contact* also have custom descriptions which will show up under these categories in the main view. You can change these descriptions in the description field(05) under each category. If the field are left empty, a standard frase will be shown.

## ADD POSTS

To add a post under a category just do as normal, you can add any html you want. The first letter should always be an initial(06). To do this, add this html `<span class="anfang">` before first letter and close the span tag `</span>` after the first letter.

a really good tagline

# ADD IMAGES TO A POST

To add a image to a post upload it to the image gallery but don't insert it to the post, just leave it in the gallery or else it will not show up correct. The width of an image should be 840 pixels but you can make it smaller, it will then center on the page.

# ADD VIDEO TO A POST

To add a video to your post you will have to use the custom fields(07) to display it correct and you will have to have vimeo, youTube or some other video hoasting service. In the *name*(08) field you type "video" and in the *value*(09) field you paste the embed source for your video.

# ADD POSTS TO ABOUT AND CONTACT

When you add a post to the categories *about* and *contact* they will appear as displayd below.

**ABOUT ME.**  
THIS CATEGORY GIVES YOU MORE INFO ABOUT ME

**GENERAL FACTS**  
Full name: Pål Wilhelm Linder  
Date of birth: 30th of January 1978  
Home town: Stockholm

**BACKGROUND**  
I was born outside of Gothenburg 1978 but grew up outside of Jönköping. I moved to Stockholm 1999 where I have lived since, except for two semesters, where I lived, studied & snowboarded in Östersund, near Åre in the northern parts of Sweden.

**EDUCATION**  
Right now I'm studying at Hyper Island at the program Interactive Art Director, before that I've studied multimedia at the University of Stockholm. I have also taken courses in sociology, information/communication & visual culture.

**SPARE TIME**  
When I have time over I listen to & produce music, mostly electro house, under the alias Heffron. I also try to snowboard as much as I can, otherwise I hang out with my friends at a café or a pub.
